

Joyce (P.6A)

I do think there are aliens in space. I would welcome

them very much but I must remind them not to drink too much water. There are only male and female washrooms in our school. We don't have washrooms for aliens.

Stella (P.6A)

I think there are. I would ask them something about their world, planet and how the animals look on their planet.

Alice (P.6A)

Yes, because nothing is impossible in this world. I would tell the aliens something about me, my school life, and I would ask them about their lives.

Recently on TV, people have been talking about whether aliens exist. So this time we asked: Do you think there are aliens in space? What would you say to them if they visited your school?

Are there aliens?

Tsz-kwing (P.6B)

Yes, I think there are because space is very big, so big you wouldn't believe. I would ask them, "Hello! Are you aliens? I want to know more about the civilisation on your planet."

Tsz-kwan (P.6B)

Yes. I would say, "Hello, aliens! Where do you live? Can we be good friends? When will you leave the Earth? Will you come back again?"

Chiu-man (P.6B)

Yes. I would say, "Hi! How are you? My name is Wong Chiu-man. What's your name? Can we be friends? Can we take a photo together for a souvenir?"
